
Bute Inlet Hydroelectric Project

Community Open House

A massive hydroelectric development is proposed for Bute Inlet, involving **17 river diversions** and a peak generating capacity of **1,027 MW** – more than the proposed Site C project!

The public has not been properly consulted about this harmful mega-development. We are offering an **open house**, to help people have their say.

Feedback can also be provided directly to government **until February 18**, with details at the Environmental Assessment Office Website: www.eao.gov.bc.ca

Open House and Presentations

**Tuesday February 10
Robson Square UBC Campus
Room C300, 7:00 – 9:30 pm**

Presentations at 7:00 from Watershed Watch, Wilderness Committee and Rafe Mair (Save our Rivers Society)

**Written feedback opportunities and information displays
available from 7:00 to 9:30 pm**
