Subject: FW: Good news? Bad news? Résultats homogenats 2011-226
Attach: ISAV 404F RA3 2011-11-03.3 2011-226.xls; ISAV 404F-RA3 2011-11-03.3 2011-226.mxp

Hi,
The homogenates (19, heart and gills) were done, and one very weak (almost 38) showed up, in one of the duplicate only.

It is not one of the positives of AVC (GFC: heart-3; AVC: heart-11, gill-2 and -10)

According to our policy, we are reextracting it.
Crystal: when ready, please run the first cDNA and the 2nd cDNA (reextraction).

I am not convinced it should be reported to our friends in Ottawa, guess why !
We do not like to see a Ct like this, but this is the type of Ct that is equivalent to the finding by Nylund, i.e. can't conclude anything from it

Nellie

Bonjour Nellie,

Bon....j'ai eu un Ct de 37.79 dans un des duplicats(tissu de cœur)...hummmmm
Je pense que j'ai assez de tissus pour re-extraire?!..

3 - C1 11:1847 2011-226-h3 No Ct V110142011-51 27 - C2 11:1847 2011-226-h3 37.79 V110142011-51
