Subject: RE: Paper

Hi Simon,
Sorry for the delay in writing back.
I found that next week is not possible for Fred because he has a fourth year rotation. This is what I am going to do. I will update the paper and distribute it. Then each member will either send me their input or we decide if we need teleconference. How does that sound?

Regards

Molly

Hi Molly,
Good idea to include Garth and Fred on the call. But it will be important ahead of time to forward the revised manuscript for us all to read before the call. The 19th or 20th of Jan will be best for me.

Cheers, Simon

Hi Simon,
Happy new year to you and your family.
I won't be available for next week but the week of Jan 15 should be OK. Since Garth and Fred are co-authors I was wondering if we could include them. I will have to update everyone by e-mailing the manuscript so that we are all on the same page.
If this is acceptable to you please let me know.
For the phone to use, I am mostly in the lab (902 566 0940) in the mornings and in the office (902 566 0904) most afternoons except Fridays. However, if you call any # and leave a message I can always get back to you.

Best regards

Molly

Happy New Year Molly.
Please let me know when will be a good time to call you. I'd like to discuss our manuscript. What telephone number should I use.
